

# VICKY CHAUBEY

Jaipur, Rajasthan, Achrol, Delhi Highway Road 303121

☎ +91-9939707286 ✉ VickyChaubey373@gmail.com 🔗 [linkedin.com/in/vicky-chaubey](https://www.linkedin.com/in/vicky-chaubey) 🐙 [github.com/vickychaubey73](https://github.com/vickychaubey73)

## Career Objective: -

Motivated **Software Engineering Intern** with a strong foundation in **computer science fundamentals**, **data structures**, and **algorithms**. Experienced in working with **cross-functional teams** to develop **high-quality** and **scalable software solutions**. Passionate about learning **new technologies**, improving **system performance**, and building **customer-focused products** in fast-paced **engineering environments**.

## Education

|                                                                                          |                                                        |
|------------------------------------------------------------------------------------------|--------------------------------------------------------|
| <b>Nims University,</b><br><i>Bachelor of Technology in Computer Science Engineering</i> | <b>Sep 2022 – May 2026</b><br><i>Jaipur, Rajasthan</i> |
| <b>Senior Secondary (12th) - Science</b><br><i>O.K.M Inter College, Lar Deoria</i>       | <b>Jul 2020 –Aug 2022</b><br><i>Lar, Deoria</i>        |
| <b>Secondary (10th)</b><br><i>O.K.M Inter College, Lar Deoria</i>                        | <b>Jul 2019–Aug 2020</b><br><i>Lar, Deoria</i>         |

## Technical Skills

**Programming Languages:** Python, Java, C++, C, JavaScript, SQL, Web Assembly

**Tools:** VS Code, Android Studio, Stanford CoreNLP, Git, Bootstrap, JQuery, GitHub

**Libraries:** NLTK, django, scipy, pandas, sklearn, gensim, keras, tensorflow, pytorch, AWS, Flask

## Experience:

|                                                                                                                                                                                                                                                                                                                                                                                                             |                                                         |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------|
| <b>KALEIDONEX TECHNOLOGIES</b><br><i>Front-End Developer Intern</i>                                                                                                                                                                                                                                                                                                                                         | <b>May 2024 – July 2024</b><br><i>Jaipur, Rajasthan</i> |
| <ul style="list-style-type: none"><li>Leveraged <b>data structures, algorithms, and OOP</b> principles to solve complex technical problems.</li><li>Worked with <b>Product and Program teams</b> to understand user needs and deliver well-designed features.</li><li>Learned and used new tools and technologies to improve <b>application performance, reliability</b>, and overall efficiency.</li></ul> |                                                         |

## Projects

|                                                                                                                                                                                                                                                                                                                                                                                                                                                  |                           |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------|
| <b>Contact Data ETL System</b>   <i>Python, Pandas, AWS RDS, Tkinter, MySQL</i>   <a href="#">GitHub Repo</a>                                                                                                                                                                                                                                                                                                                                    | <b>Dec 2025 – Present</b> |
| <ul style="list-style-type: none"><li>Implemented <b>Extract–Transform–Load (ETL)</b> flow to ingest and clean CSV data using Pandas.</li><li>Integrated with <b>MySQL / AWS RDS</b> for cloud-based data storage and CRUD operations.</li><li>Designed a <b>Tkinter GUI</b> for analytics, import/export, and contact management.</li><li>Demonstrated end-to-end <b>Data Engineering workflow</b> with Python and Cloud integration.</li></ul> |                           |
| <b>Net-Banking System</b>   <i>Java, Java-Swing, MySQL</i>   <a href="#">GitHub Repo</a>                                                                                                                                                                                                                                                                                                                                                         | <b>April 2024</b>         |
| <ul style="list-style-type: none"><li>Developed a Net-Banking System using <b>Core Java</b> with a user-friendly interface.</li><li>Implemented secure <b>login and authentication</b> features for safe user access.</li><li>Enabled core banking operations such as <b>balance inquiry, fund transfer, and deposit</b>.</li></ul>                                                                                                              |                           |
