| • Apex Triggers | • Lightning Web Components(LWC) | • Salesforce Sales Cloud |
| • Apex Flow | • Integration (Rest API & SOAP API) | • Git Deployment |

Experience

Technology Associate | Tekgeminus Solutions Pvt Ltd, Pune | *May 2022 - present*

- Extensive knowledge about creating objects, fields, Record Types, workflows, approval processes, Escalation rules, Assignment rules, profiles, validation rules, Email services, data migration activities, custom page layouts, custom fields and other standard functionality.
- Collaborated with stakeholders and cross-functional teams to gather requirements, analyze business processes and design solutions that leverage salesforce capabilities to improve operational efficiency and customer experience.
- Converted Visualforce pages to lightning web component (LWC) with functionality.
- Developed and optimized Apex classes and triggers to customize salesforce functionality according to business requirements.
- Developed and optimized asynchronous Apex solutions including Batch Apex, Queueable Apex, future and Scheduled Jobs to handle large data volumes and improve system performance.
- Creates Lightning flows according to business model requirements.
- Worked with Jira to update the user stories and defect tracking.
- Designed and implemented Salesforce integration with Xero using REST APIs for seamless sync of invoices, payments, and contact data.
- Built Apex callouts to securely communicate with Xero endpoints and handled authentication using OAuth 2.0.
- Developed custom Apex classes and asynchronous jobs (Batches) to fetch and update invoice records from Xero.
- Defined and enforced data validation rules using validation rules to capture relevant data.
- Followed Salesforce security best practices and data governance policies, including role-based access and field-level security to protect sensitive data.
- Provided ongoing support and troubleshooting for salesforce automations, addressing user-reported issues, identifying root causes and implementing corrective actions to maintain system stability and functionality.
- Designed user interfaces using Lightning Web Components for enhanced visual presentation on Experience cloud.
- Developed Apex classes and validation Rules to enforce data integrity and business logic.
- Implemented custom labels and Custom Settings to facilitate dynamic customization.
- Utilized Data Loader for efficient insertion and updating of records in salesforce.
- Developed salesforce reports and dashboards.
- Leveraged Salesforce Lightning, Salesforce Development Life Cycle, Process Automation, Security Model and Data Models to build robust, scalable solutions.
- Used GitHub for version control and CI/CD deployments.
- performed validations and deployments using Workbench and Change Sets.
- Worked with JIRA for agile project tracking and collaborated with stakeholders to gather requirements and deliver custom solutions.
