EXPERIENCE

Cloud Analogy CRM Specialist Ltd, Salesforce Developer

July 2022 - Present

Salesforce Developer responsible for handling and delivering the projects with both Development and Client facing capabilities.

- ▶ Successfully delivered 3 real time projects by delivering front-end and back-end architecture and functionality by translating development requirements.
- ▶ Tested functionality, performed debugging and carried out modifications to conduct quality checks.
- ▶ Designed and developed forward-thinking systems that meet user needs and improve productivity
- ▶ Monitored and maintained backup and recovery plans, best practices and versioning processes.
- ▶ Worked closely with clients to establish specifications and system designs.

PROJECTS

Eduvanz Finance

Worked as Salesforce Developer to build the new functionalities and ideas, resolving the bugs including testing and debugging.

- ▶ Eduvanz is an NBFC and private finance company that offers low interest student, education, career, and skill development loans.
- ▶ Worked on Email functionality and Email service class to automate record creation through Email.
- ▶ Worked on triggers, batch classes, flows and LWC components.
- ▶ Debugging, resolving and testing the bugs with production support on alternate weekends.

Persistent Systems

Worked as Salesforce Developer responsible for handling and delivering the projects with both Development and Client facing capabilities.

- ▶ Worked on Simpplr App, a comprehensive intranet that unifies employees' experience in one platform. Enable employees to create Profiles, share content, Follow pages and users, and engage in polls and surveys.
- ▶ Responsible for creating new and customizing the existing functionalities through Apex, JS, and VF pages..
- ▶ Also served as a supportive hand for client-reported issues and bugs and resolving them on priority.
- ▶ Responsible for creating best possible and optimized solutions such as reducing performance issues using platform caches in apex.

Rainmaker BrandMaker

Worked as Salesforce Developer responsible for converting the client requirements into development requirements and then to real time functionality.

- ▶ Project is Based on Sales Cloud where I had worked as a Shadow developer.
- ▶ I have worked on automation like triggers, flow and migrating process builders to flow.
- ▶ Worked on LWC components and apex to customize and develop new functionalities.
- ▶ Integrated the system with whatsapp to send the users order details.
