## PROFILE

Dynamic and results-oriented Salesforce Developer with a passion for leveraging technology to drive business growth. Adept at designing and implementing Salesforce solutions to streamline processes and enhance user experience. Proven ability to collaborate with cross-functional teams to deliver high-quality solutions that meet business objectives. Strong analytical skills with a focus on continuous learning and improvement. Seeking to leverage expertise in Salesforce development and administration to contribute to a forward-thinking organization.

## SKILLS

Validation Rule, Workflow, Approval Process, Salesforce Security, Flow, Reports and Dashboards, Data Management , Apex ,Salesforce Testing, Apex Triggers, Salesforce Lightning Experience, Asynchronous Apex, SOQL, Salesforce DX , SOSL ,Trigger, HTML, CSS, LWC

## TOOLS

VS Code, Lightning Studio, Dataloader, Salesforce CLI,Salesforce Inspector,Salesforce Schema Builder,Developer Console, SOQL Query Editor

## EDUCATION

### Bachelor of Science

Veer Bahadur Singh Purvanchal University

2019-2022

### DUCAT IT Training Institute

Salesforce Admin and Salesforce Development  
DUCAT, Noida  
Completed: 2024

## LANGUAGES

English

Hindi

## WORK EXPERIENCE

### Salesforce Developer | DUCAT | October 2023 - March 2024

- Managed and maintained internal Salesforce org, ensuring optimal performance and functionality for business operations.
- Implemented enhancements and resolved issues identified through user feedback and system monitoring.
- Developed and optimized Salesforce reports and dashboards to provide actionable insights to stakeholders.
- Collaborated with stakeholders to gather requirements and prioritize development tasks based on business needs.

## DESCRIPTION

As a Salesforce developer, I managed and maintained our internal Salesforce org for optimal performance. I implemented enhancements and resolved issues based on user feedback, utilizing Salesforce Administration and Apex. I developed and optimized reports and dashboards to provide actionable insights. Collaborating with stakeholders, I prioritized development tasks. I also streamlined processes using Salesforce Workflow Rules, Data Loader, and Salesforce DX, while continuously enhancing my skills through Salesforce Trailhead.

## ACHIEVEMENTS

I have earned 34150 Trailhead points and achieved the prestigious Mountaineer rank, demonstrating my commitment to continuous learning and mastery of Salesforce skills. With 52 badges to my name, I have completed a diverse range of Trailhead modules, further enhancing my expertise in Salesforce development and administration.

---

## PROJECT

### Sales Cloud

- Implemented Sales and Service Cloud solutions for clients, focusing on enhancing customer relationship management and increasing sales productivity.
- Designed and configured custom Salesforce applications, including customization of page layouts, fields, and record types to meet specific business requirements.
- Developed and deployed Apex triggers and classes to automate business processes and enforce data validation rules.
- Collaborated with cross-functional teams to gather requirements, design solutions, and ensure successful implementation of Salesforce projects.
- Utilized Salesforce Lightning Experience to create Lightning components and enhance user interface design.

## Trailhead Project

### Apex Development

I actively participated in projects that required extensive Apex development to tailor Salesforce functionalities according to specific business requirements. From writing custom controllers and extensions to implementing complex business logic, these projects equipped me with a strong foundation in Apex coding standards and best practices.

### Automation

My involvement in automation projects extended beyond the mere implementation of Salesforce Workflow Rules, Process Builder, and Flow. I meticulously analyzed business processes, identified areas for automation, and designed comprehensive automation solutions that not only streamlined operations but also optimized resource utilization and minimized errors.

### SOQL

As part of various projects, I delved into the intricacies of SOQL queries, leveraging its power to extract, manipulate, and analyze data within Salesforce. Whether it was querying multiple objects, performing aggregate functions, or executing subqueries, I acquired a deep understanding of SOQL's capabilities and its role in effective data management.

### Trigger

The projects involving Apex triggers provided me with invaluable insights into the finer nuances of event-driven programming within the Salesforce ecosystem. From before-insert triggers to after-update triggers, I mastered the art of crafting trigger logic that seamlessly integrated with existing workflows and enforced data integrity rules without compromising system performance.

### Data Security

As custodians of sensitive information, ensuring robust data security measures was paramount in every project I undertook. From defining object-level security settings to implementing field-level encryption, I collaborated closely with stakeholders to devise comprehensive data security strategies that safeguarded against unauthorized access, data breaches, and compliance risks.

### Lightning Web Components (LWC)

The transition to Lightning Web Components marked a significant milestone in my Salesforce journey. Through hands-on projects, I explored the capabilities of LWC to deliver lightning-fast, responsive user interfaces that seamlessly integrated with Salesforce data and processes. From building custom components to optimizing performance, I embraced LWC as the future of Salesforce development.

Each of these projects not only enhanced my technical acumen but also honed my ability to collaborate effectively with cross-functional teams, communicate complex ideas concisely, and adapt to evolving business needs. As I continue to embark on new challenges and opportunities, I remain committed to leveraging my experiences and skills to drive innovation and create value in the Salesforce ecosystem.
