

YASH JAIN

Fresher Salesforce Developer | AI & Automation Enthusiast

yashjain7677@gmail.com | +91 9509886617 | Ajmer, Rajasthan

PROFESSIONAL SUMMARY

Self-motivated BCA graduate with hands-on experience in Salesforce Administration, Flow automation, and Apex triggers. Proficient in AI tools (ChatGPT, Claude) for code generation and problem-solving. Skilled in web development and database management. Eager to contribute to Salesforce projects while leveraging AI for innovative solutions.

TECHNICAL SKILLS

Salesforce: Administration • Flow Builder • Apex Triggers • Validation Rules • Data Management • Reports

AI Tools: ChatGPT • Claude AI • Prompt Engineering • AI-Assisted Coding • Generative AI

Programming: HTML5 • CSS3 • JavaScript • Java • MySQL

Tools: Salesforce Trailhead • VS Code • Git • MS Excel • Developer Console

EDUCATION

Bachelor of Computer Application (BCA) | Dezyne École College, Ajmer | 2022-2025

Senior Secondary (Commerce) | St. Stephen's Sr. Sec. School, Ajmer | 2021 | 79%

PROJECTS

RailConnect - Railway Booking System | *Salesforce Platform*

- Created **Apex trigger** for passenger data validation before record insertion
- Configured **validation rules** ensuring data quality and designed reports for booking analytics
- Built practice Salesforce project implementing **Flow automation** for email notifications on new bookings

Smart Attendance System | *HTML, CSS, JavaScript*

- Built a fully client-side **Smart Attendance Tracker** using HTML5, CSS3, and JavaScript with a responsive, device-friendly interface compatible across desktops, tablets, and mobile devices.
- Implemented **dynamic attendance marking** with real-time status updates (Present/Absent/Leave), automatic percentage calculation, and colour-coded indicators per student.
- Designed an intuitive **dashboard with summary statistics** — total sessions, attendance percentage, and trend indicators — all computed in real time without a backend.
- Leveraged **LocalStorage** for persistent data retention across sessions and used JavaScript ES6+ features (modules, arrow functions, destructuring) for clean, maintainable code.
- Applied **CSS Grid and Flexbox** for responsive layouts and custom CSS animations for smooth UI transitions, enhancing user experience.

TRAINING & LEARNING

- **Salesforce Trailhead:** Active learner (Admin, Flow, Apex modules in progress)
- **Supabase & Prisma Workshop** (2024)- Modern database technologies
- **AI & Prompt Engineering:** Self-learning through practical applications

KEY STRENGTHS

- ✓ **AI-Savvy:** Proficient in ChatGPT, Claude for productivity
- ✓ **Quick Learner:** Self-taught Salesforce through projects
- ✓ **Problem Solver:** AI and logical thinking for debugging
- ✓ **Adaptable:** Fresh perspective on AI-driven development
