Attained an outstanding academic achievement with an impressive aggregate of 95%.

Certifications

Salesforce Certified Platform Developer I

Salesforce Certified Administrator

Salesforce Certified Associate

Java Basic certification by Hacker Rank

OOP in Java by University of California San Diego on Coursera

Employment History

Senior Salesforce Developer, Deintellekt Software., Remote

OCTOBER 2023 – PRESENT

Actively developing for the Link Logistics project, the largest U.S.-only operator of last-mile industrial real estate. Leveraging Apex, Salesforce platform development, and Lightning web components to enhance project functionality. Additionally, played a crucial role in data loading activities, ensuring accurate and efficient management of project data.

Salesforce Developer, Metacube Software Private Ltd., Jaipur

NOVEMBER 2020 – OCTOBER 2023

Specializing in FinancialForce SRP and SCM software, I excel in Salesforce development with expertise in Apex, Lightning Web Components (LWC), Triggers, and Batch Classes. Proficiently use version control tools (Git), project management tools (Jira), and repositories (Stash) for streamlined development workflows.

Internships

Java Development Intern, Metacube Software Private Ltd., Jaipur

MAY 2019 – JULY 2019

Acquired advanced Java development skills through comprehensive training. Designed and developed the Nitya Emails web platform for seamless email communication, demonstrating practical application of Java expertise. Access the project's code repository at: <https://github.com/pandayashasvi/Nitya-Emails.git>.

Software Engineer Intern, Agile Tech Experts, Jaipur

DECEMBER 2018 – JANUARY 2019

Used Microsoft Visual Studio 2010 and SQL Server 2008 regularly. Trained in ASP.NET for web development. Contributed to Agile software projects, demonstrating adaptability and collaboration.

Internship, The Akshaya Patra Foundation, Jaipur

JUNE 2018 – JULY 2018

Participated in sessions on Management, Soft Skills, and Personality Enrichments during a personal development internship. Also, attended an insightful industrial visit to Bosch Jaipur.

Projects

PSA FFA Connector

Led the development of a FinancialForce product serving as an integration point between PSA and FFA. Initiated the project from scratch, employing Apex programming, triggers, batch classes, and Lightning web components. Maintained ongoing client discussions for feature refinements and project enhancements.

Supply chain management

Contributed to the integration between SCM and Avalara in the FinancialForce project, facilitating seamless connectivity between the two systems.

SCM FFA Connector

Developed a connector product within FinancialForce, seamlessly linking SCM and FFA products to enhance interoperability and streamline processes.

Nitya Email

Developed an email system using Java, MySQL, HTML, CSS, and Bootstrap. Access the detailed project report [here](#).

An-Suicide Fan

Developed a suicide prevention system using Arduino, Load Cell, and GSM-SIM-900-A module. The hardware detects abnormal fan weight, triggering actions like door opening, fan lowering, and sending alerts to guardians/wardens. An LCD in the corridor indicates the room where a suicide attempt is detected.

HT monitoring System

Implemented a system to curb corruption in Dhanbad's mining sector. Technologies included PHP, JavaScript, HTML, and MYSQL. Hardware components like Load Cell, Arduino, and SIM GSM-900-A were employed to weigh trucks and transmit data to the server. The web app authenticated truck details, contributing to the reduction of corruption in the mining process.
