

Curriculum Vitae

SUHAS KAMBLE

(Salesforce Developer)

Mobile No:- **9209491438** Email: kamblesuhas12@gmail.com

CAREER OBJECTIVE

Seeking a position to utilize my managerial & technical skills and get associated with an organization where I can contribute towards organizations growth along with personal growth.

Professional Summary

Having 2 years of IT experience with salesforce.com, CRM technology as an Admin and Development.

Well adept with Configuration, Trigger, Apex programming, Lightning Web Component and Integration. Majorly worked on force.com custom apps.

- Experienced in analyzing business requirements, Entity Relationship diagram and implementing them to Salesforce
Custom objects, Junction objects, Master-detail relationships and Lookup relationships.
- Experienced in admin modifications like **Creating Roles, Profiles, Page Layouts, Workflow, Process builder, Approval Process and Flow builder.**
- Proficient in dealing with functionalities related to **Sales Cloud , Service Cloud and Field Service Lightning.**
- Excelled in working with various salesforce.com standard objects like Accounts, Contacts, Opportunities, Cases, Leads, Reports and Dashboards.
- Strong Salesforce development experience with **Apex Classes, Triggers, Controller Classes**
Integrating with external sources by developing Apex Web Services for inbound calls to salesforce.
- Experienced in **integration** of Salesforce.com with external applications by using **SOAP API** and **REST API.**
- Implemented **security and sharing Settings** in object, field, and record level for different users at different levels of organization.
- Experience in web technologies including **HTML, XML, CSS** and **JavaScript.**
- Experience in working with client specific solutions like Salesforce.com Sandbox **deployments**, Force.com SOQL, SOSL and various production environments.
- Deployed salesforce components from Sandbox to other Sandboxes and Production instances using Force.com Migration tools **Change Set.**
- Proficient in using tools like **Salesforce Apex Data Loader.**
- Experience in presenting proof of concept to idealize the complex customer requirement, requirement impact analysis, creating integration and application technical design documentation, estimating project timelines, and highlighting potential risk.
- Ability to meet deadlines and handle pressure in coordinating multiple tasks in a work/project environment. Versatile team player with excellent analytical and presentation skills.
- Strong understanding of fundamental business processes, excellent communication, and interpersonal skills with ability to work well in a dynamic team environment.

PROFESSIONAL EXPERIENCE

Tech Celestial Innovation LLP

July 2022-July 2024

Project 1: Human Resource Management (HRM)

Human Resource Management System (HRMS) refers to an array of software including Human Capital Management (HCM) and Human Resource Information System (HRIS) that help HR staff take care of an organization's most valuable assets, people. HR tasks are too complex and time-consuming when performed manually. Leveraging the help of a technological solution like an HRMS can help you save time, cut costs, and manage your staff better.

Responsibilities:

- Performed detailed analysis of business and technical requirements and designed the solution by customizing various **standard objects** of **Salesforce.com**.
- **Designed, implemented**, and deployed the **Custom objects, Page layouts, Custom tabs, Controller Classes**, Extensions and Components to suit the needs of the application.
- Worked with various Salesforce.com standard Objects like **Accounts, Contacts, Leads, Cases, reports** and **Dashboard**.
- Designed, Developed and Deployed **Apex Classes, Controller Classes** and **Apex Triggers** for various functional needs of the application.
- Developed complex logic in **Batch Class** and **Schedule classes** to execute large data in batches by invoking Scheduled Class.
- Developed business logic as per business requirements using **Apex Classes, Triggers, Test methods** and writing **SOQL queries**.
- Worked on Timesheet module and Employee On-Boarding module.
- Responsible for gathering requirements and discussing the possible solution with team.
- Developed **Apex Classes, Apex Triggers** and **Lightning Web component** for various functional needs in the application.
- Defined **Org Wide Default**, to achieve the Sharing Model in this Application.
- Created various Custom tabs/apps as per requirements for this Application.
- Responsible for communicating with team on queries/clarifications/suggestions/ planning with regards to Development.
- Worked on User Interface of this Application.
- Created **Workflow rules, Validation rules, Configuration** and defined related tasks, **triggered tasks, Email alerts** and Field updates to implement business logic.
- Experienced **Data loader** user with knowledge on complex and large CSV files for faster data Integration into the Salesforce.
- Debug Apex scripts using **Debug Logs** and **System Log Console** to catch Exceptions and execute Governor Limits.
- Performed Data migrations using Salesforce.com **Data Loader**.
- Used the **Sandbox** for testing and migrated the code to the **deployment** instances after testing using **change sets**.
- Involved in daily standup meetings, Scrum. This resulted to bring good solution to the business requirement.

Project 2: VMS (Vendor Management System)

A Vendor Management System (VMS) is a software suite that helps businesses take care of vendor management processes end-end, from initial contract to final closure of a deal or while establishing a business relationship.

Another module Time sheet: timesheet management is a practice of monitoring and analyzing employee Timesheets and time tracking (recorded work hours). It can also involve taking different actions e.g. calculating employee payroll or invoicing the client based on these timesheets.

Responsibilities:

- Involved in various activities of the project, like information gathering, analyzing the information, documenting the functional and nonfunctional requirements.
- Involved in creating Entity Relationship diagram.
- Created many **Aura Lightning Components** and server-side controllers to meet the business requirements.
- Implemented **Apex Scheduler** and **Triggers** to invoke Apex classes at regular intervals.
- Worked on **notes & attachment** in LWC.
- Implemented **Apex Classes, Controller classes & Triggers** and linked them to manage the workflows Implemented in the system.
- Developed several **Triggers, Apex classes** as part of the application development.
- Worked on various salesforce.com standard objects like Accounts, Contacts, Case and Opportunities.
- Customized the **Dashboards** to track usage for productivity and performance of business centers and their sales teams.
- Worked with non-versioned artifacts like Styles(.CSS), Documentation(.doc), Design, SVG.
- Designed, Implemented, and deployed the **Custom objects**, Page layouts, Custom tabs, Components to suit to the needs of the application.
- Executed **workbench** and Data loader to verify data in SFDC.
- Worked on Developer Console and Anonymous blocks development tools for developing, debugging, and testing of Apex classes, triggers and test classes.
- Used Data Loader for insert, update, and bulk import or export of data from Salesforce.com objects. Used it to read, extract, and load data from comma separated values (CSV) files.
- Used **SOQL & SOSL** with consideration to Governor Limits for data manipulation needs of the application using platform database objects.
- Created various **profiles** and **permission sets** according to the business needs.
- Worked on Inbound and Outbound change sets for deployment.
- Created various profiles and configured the permissions based on the organizational hierarchy requirements.

Certification

Salesforce Certified Platform Developer 1 (PD 1).

Technical Skill

Salesforce.com	Lightning Web Component, Batch class, SOQL, Reports, Workflows, Email Templates, Formulas, Validation Rules, Workflow Rules, Schedule, Apex Classes, Apex Triggers, Test Classes, Lightning Experience and Extensions, Integration, Deployment.
SFDC Tools	Data Loader, Visual Studio Code, Developer Console, Git
Programming Languages	APEX, Java, JavaScript, HTML, CSS
Platforms	Windows
Office Tools	MS Excel, MS Word, Outlook

Education

Bachelor of Computer Science And Engineering

Declaration

I hereby declare that the above mentioned particulars are true up to the best of my Knowledge and belief.
