WORK EXPERIENCE

Software Engineer

Marktime Technology Solution Pvt. Ltd, Jaipur

Sep 2022 - Present

Vrddhi – Agriculture CRM (Salesforce)

Duration: 8 Months

- Developed and optimized Apex triggers and classes for automating business logic.
- Created dynamic Lightning Web Components (LWC) to enhance user experience.
- Configured Flow Builder for business process automation and email notifications.
- Wrote scalable Apex code, ensuring governor limits were respected.
- Worked with the QA team to debug issues and deliver defect-free modules.
- Collaborated with stakeholders to gather requirements and deploy features on sandbox and production environments.

Technologies Used: Apex, LWC, Flow Builder, SOQL, Salesforce Platform

Client Portal UX Fix – Salesforce Experience Cloud

Duration: 8 Months

- Improved portal responsiveness and UI using mobile-first design in LWC.
- Fixed layout issues across multiple devices ensuring consistent branding.
- Collaborated with designers and UX team to implement feedback-driven improvements.
- Used CSS grid and Flexbox for advanced layout control in responsive environments.

Technologies Used: LWC, HTML, CSS, Experience Cloud

Marketing Cloud – Node.js

Duration: 6 Months

- Developed a scalable backend CRM system to manage client contacts, opportunities, prospects, and campaign data.
- Designed RESTful APIs for handling product and service information, file uploads, and email notifications.
- Integrated modules for campaign management, including automation of follow-ups and notifications.
- Implemented secure authentication and authorization using JWT and role-based access control.
- Handled email services integration for sending transactional and campaign-related notifications.
- Managed large datasets and ensured data consistency and integrity using MongoDB and Mongoose ORM.
- Optimized API performance and database queries for high responsiveness and scalability.
- Collaborated with DevOps for deploying the platform to a cloud environment with CI/CD pipelines.
- Ensured backend security through input validation, encrypted storage, and secure API endpoints.

Technologies Used: Node.js, Express, MongoDB, Mongoose, JWT, REST APIs

Zoho CRM

Duration: 12 Months

- Developed a UI and functionality similar to Salesforce CRM using Zoho CRM platform.
- Implemented features for lead generation, campaign management, and sales tracking.
- Created customized reports and dashboards for data visualization and decision-making.
- Utilized Zoho widgets to build a custom UI and integrated it with Zoho APIs for seamless data flow and operations.
- Ensured that the platform was scalable, maintaining optimal performance with large sets of customer and lead data.
- Led the development of the custom UI using Zoho widgets, ensuring the design aligned with the user experience goals.
- Worked with the team to integrate Zoho CRM APIs for smooth data synchronization and automation of marketing campaigns.
- Collaborated with stakeholders to define CRM requirements, focusing on lead management, customer segmentation, and campaign analytics.
- Created custom reports and dashboards for data representation and provided insights to the sales and marketing teams.
- Optimized the platform for performance, ensuring fast response times when handling multiple leads and customer data.

Technologies Used: Zoho CRM, Zoho Widgets, Deluge Scripting, Zoho APIs, HTML, CSS, JavaScript
