Project : **Rental Homes Website**

Technology Used –

Frontend Technology : HTML, CSS, Bootstrap

Backend Technology : Python, Django Web Framework

Description –

The Rental Homes website is an online platform created to make easy the search of people looking for rooms, flats or homes available for rent by providing all this information at one place.

This project can also be used for promoting the flats and houses of the people who wants to let their places on rent.

In addition, this platform also promotes the food service availability for people who require it.
