Experience	
SK Finance Limited (Business Analyst - Process & Digitalization Enhancement Group - SME) ~ “Aug 2023 – present” Account Aggregator: - Researched and on-boarded the vendor “One Money” to implement the feature of Account Aggregator. A platform that helps to fetch the Customer Banking details along with the account-wise analysis directly from the Bank with the help of a Single OTP. This leads to an increase in the file login count by 60%, reducing the TAT. Customer Application: Created the project work flow and frontend of the customer application using the balsamic wireframes and Microsoft Visio. Mapped the parameters of API integrated to FinOne and Toolyt platforms. Face-Matching Solution: Researched on face matching solutions providers and tested the API to integrate with SKOP platform. A tool that helps in face comparison and face liveness to verify the customer’s KYC details during the file login. Pre PD-Report: (Smart Customer Summary) This project consists of designing a smart one-pager that encompasses all the forms of key information for the movement of any file. This includes the referencing of fields in forms with the Smart summary.	

Internship	
Axetrack Software Solutions (Business Analyst and Frontend Angular Developer) ~ “Jan 2022 - July 2022” (Business Analyst): Worked on DOST and PRIME software and prepared the complete GUI using the Balsamiq software and workflow using Lucid Charts. Prepared the FRD, BRD, SRS for the mentioned software. Proficient in requirement gathering, skilled at collaborating with stakeholders to elicit and document project specifications. Experienced in translating complex business needs into clear and actionable requirements. Skilled in understanding client needs, delivering solutions, and resolving conflicts effectively. (Frontend Angular Developer): Worked on 2 Major projects DOST and PRIME. Created many pages like salary, task management, kanban etc and mapped the data coming from the backend. I worked on the framework Angular.
