Profile

Aspiring software developer with proficiency in C++, Java, C, HTML, and CSS. "Education Information System" project in Core Java, focusing on user registration, and a user-friendly interface. Strong analytical skills and a passion for solving complex problems. Eager to apply my academic foundation and project experience in real-world scenarios. Enthusiastic about continuous learning, staying updated on industry trends, and contributing to collaborative team environments. Seeking opportunities to grow my programming skills and gain hands-on experience in software development.
