

PUSPANJALI SAMANTA SINHAR

Email id: puspanjali040@gmail.com | <https://portfolio-puspanjali.netlify.app/> | Mobile No: 8249298564

PROFESSIONAL SUMMARY:

Aspiring Full-Stack Developer with a solid foundation in programming and web technologies. Passionate about building seamless user experiences and contributing to all stages of the development lifecycle. Eager to bring my skills and curiosity and contribute to impactful software solutions.

EDUCATION:

- Graduation in Computer Science Engineering from SERC, Odisha. (2025)
- Diploma from Govt. Polytechnic, SCTEVT, Odisha. (2019)
- Intermediate from Ramadevi Women's University, CHSE, Odisha. (2017)

TECHNICAL SKILLS:

Frontend Technologies:

- Proficient in **HTML5**, with strong knowledge of semantic elements, attributes, and best practices for accessible and structured markup.
- Skilled in **CSS3**, including advanced layout techniques using Flexbox and Grid, along with efficient use of selectors and responsive design principles.
- Solid understanding of **JavaScript** fundamentals, such as variables, scope, functions, ES6+ features, and event handling.
- Familiar with **React.js**, with hands-on expertise in JSX, Virtual DOM, Functional Components, and React Hooks, React Props, React Router, Redux, Redux Toolkit, and **Tailwind CSS** for state management and modern UI design.

Backend Technology: Java, Firebase

- Strong understanding of variables, control statements, functions, and recursion.
- Good knowledge of Object-Oriented Programming (OOPs) concepts: Inheritance, Polymorphism, and Encapsulation.

Database: SQL

Tools and Platforms: MS Office, Eclipse, VS Code, Figma

PROJECTS:

Student-Teacher Management System

- **Tech Stack:** SQL, HTML5, CSS, JavaScript, Bootstrap
- **Description:** This web-based application is designed to manage registrations and interactions between students and teachers featuring two separate dashboards, ensuring role-based functionalities and access.

Data Management Website

- **Tech Stack:** React.js, Tailwind CSS, react-routing, redux
- **Description:** A full-stack data management platform that allows users to create, update, view, and delete records with real-time UI updates. Integrated a structured backend for secure data storage and implemented smooth client-side routing with efficient global state handling.

DECLARATION: I hereby declare that all the above information provided are true to the best of my knowledge and belief.
