Computer Science Engineering

CGPA: 8.31

Projects

Moving Object Detection using YOLO - NAS

The Objective of Real Time Object Detection is to find the location of an object in a given picture accurately and mark the object with the appropriate category. We have used Real Time object detection You Only Look Once algorithm to train our machine learning model. In this project, we are training the model to detect the personal protective equipments within seven different labels and identify them in any given image or video.

Voice Operated Personal Assistant

Made a voice operated personal assistant using python language and libraries of python in collaboration Upflairs Pvt. Ltd.
