## PERSONAL PROJECTS

### Recruitment App

- Introducing a dynamic Salesforce project designed to streamline the organizational hiring process. This robust application features custom objects tailored for efficiency: from the comprehensive Position object capturing job specifics, to the Job Application custom object meticulously housing applicant data, and beyond.

### Institute Management App

- A custom institute management app organizes students into batches with courses and faculty. It tracks student performance via subject ratings across batches. Faculty use average ratings to improve teaching. The app streamlines schedules, assignments, and progress monitoring.

### Bank Management App

- Developed a robust bank management application featuring objects like bank, branch, bank account, transaction, loan, and loan detail. Designed to function as a full-fledged banking system, it enables seamless account management, transaction processing, loan tracking, and detailed reporting. Streamlined banking operations with secure, scalable, and user-friendly features.
