ACADEMIC PROJECTS

PROJECT 1

Title : A Secure Data Sharing Scheme For Cloud Computing

Description : *The Popularity of cloud computing, can retrieve/store personal data from anywhere at any time, consequently the data security problem in mobile cloud becomes more and more severe and prevents further development of mobile cloud.*

A Light weight data sharing scheme is proposed in mobile cloud that adapts CP-ABE and it delegates the maintenance of access control tree structure to the proxy server and makes it light weight secure scheme.

Duration : 3 Months

STRENGTHS

- Willing to be a quick learner and an implementer.
- Able to work individually and also in a team.
- Positive Thinking.
