PROFESSIONAL SUMMARY

Salesforce Developer with 2+ years of experience. Proven ability to analyse, design and optimize business processes with hands-on experience implementing change, increasing user adoption and driving best practice.

- Experienced in Salesforce Data security using Org Level Security, Profiles/Permission Sets, OWD, Role Hierarchy, Sharing Rules and Manual Sharing.
- Experienced in analysing business requirements and implementing the database structure using Salesforce's Custom objects, Master-detail / Lookup relationships, Formula fields, Roll-up Summaries, Field dependencies, etc.
- Extensive experience on creating Apex Classes, Apex Triggers, Lightning Web Components and JavaScript.
- Expertise in retrieving data using SOQL and SOSL and data manipulation through DML Operations.
- Created and used Asynchronous operations like @Future, Batch Apex, Scheduled Apex and Queueable Apex.
- Experienced in creating Asynchronous Triggers like Change Data Event Triggers and Platform Event Triggers.
- Have used Apex to create Controllers, Extensions, Triggers, Rest Resources, Utility Classes, Helper Classes, etc.
- Experienced in using Automation tools like Process Builder, Flow Builder, Workflow Rules, Validation Rules, Approval Processes, Assignment Rules, Auto-Response Rules and Escalation Rules.
- Experience in Integration with salesforce using Rest API.
- Worked with various salesforce Standard objects like Account, Contact, Opportunity, Case, Lead, Campaign, etc.
- Experienced in Importing and Exporting data with the help of Import Wizard and Data Loader.
- Have created Reports and Dashboards to analyse data visually.
- Have basic knowledge on Visual Force Pages and Aura Components.
