PROFILE SUMMARY

To secure a position with well-established organization, I am enthusiastic to contributing my knowledge to organization's developing infrastructure. Leveraging my academic background and a strong foundation in salesforce admin and developer concepts, I am eager to learn, grow, and make valuable contributions to the team.

SKILLS

Salesforce CRM | Salesforce admin | Data Model | Business process automations | Reports & Dashboards | User Management | Data Management | Salesforce development | Apex | SOQL | API | LWC | Aura | Visualforce | JavaScript | Postman tool | Java | CSS | HTML | GitHub | VS code | REST API | Object-Oriented Programming (OOP) | Windows.

PROJECTS

Organizations Accounts and Contacts Management.

Overview: Developed a lightning app-page which offers seamless data manipulation, filtering options in objects with responsive design. Creation of a thoroughly designed this project on Salesforce which enhanced user experience across diverse devices. Achieved data optimization through dynamic filtering and sorting in the component.

Technologies: LWC (library-elements, layout, card) | Lightning Message Service | Decorators | Apex | Page Layouts | App Builder | JavaScript events.

IMDB Movie details using API.

Overview: integrated Salesforce with the IMDB API and managed tasks on the Salesforce platform to handle movie details. Implemented robust IMDB API integration in Salesforce by setting up OAuth 2.0 Authorization, tested API calls through Postman tool. developed an Apex method and class for seamless HTTP callouts on search events.

Technologies: OAuth 2.0 Authorization | REST API, OAuth 2.0 Authorization | LWC | Apex | API Providers | Remote sites | Postman tool.

Analog Clock.

Overview: Created user-friendly analog clock using HTML, CSS, JavaScript languages. Developed an analog clock using modern web technologies and some logical rotation formula. The clock will display the current time with a smooth-moving second, minute, and hour hands, replicating a traditional analog clock.

Technologies: HTML | CSS | JavaScript.

EDUCATION

Bachelor of Engineering (B. E.) – Electrical and Electronics.
SGBIT Engineering College, Belgaum (VTU)

AUG 2019 – MAY 2023
CGPA: 7.4

INTERNSHIP

Implementation of cisco devices.

Organization: BITS Belagavi.

Description: During this internship, I gained knowledge on basics of computer networking, Cisco devices, IP addressing, routing configurations and protocols. It helps in understanding the functioning of computer networks for sharing data and communication.

CERTIFICATES

- Salesforce Admin/Developer (Udemy).
- International journal of research publication and reviews (Sr. No: IJPR 54919)
